ENSAMBLES

Climate change and its impacts at seasonal,
decadal and centennial timescales

Summary of research and results from the
ENSAMBLES project

<http://www.ensembles-eu.org/>

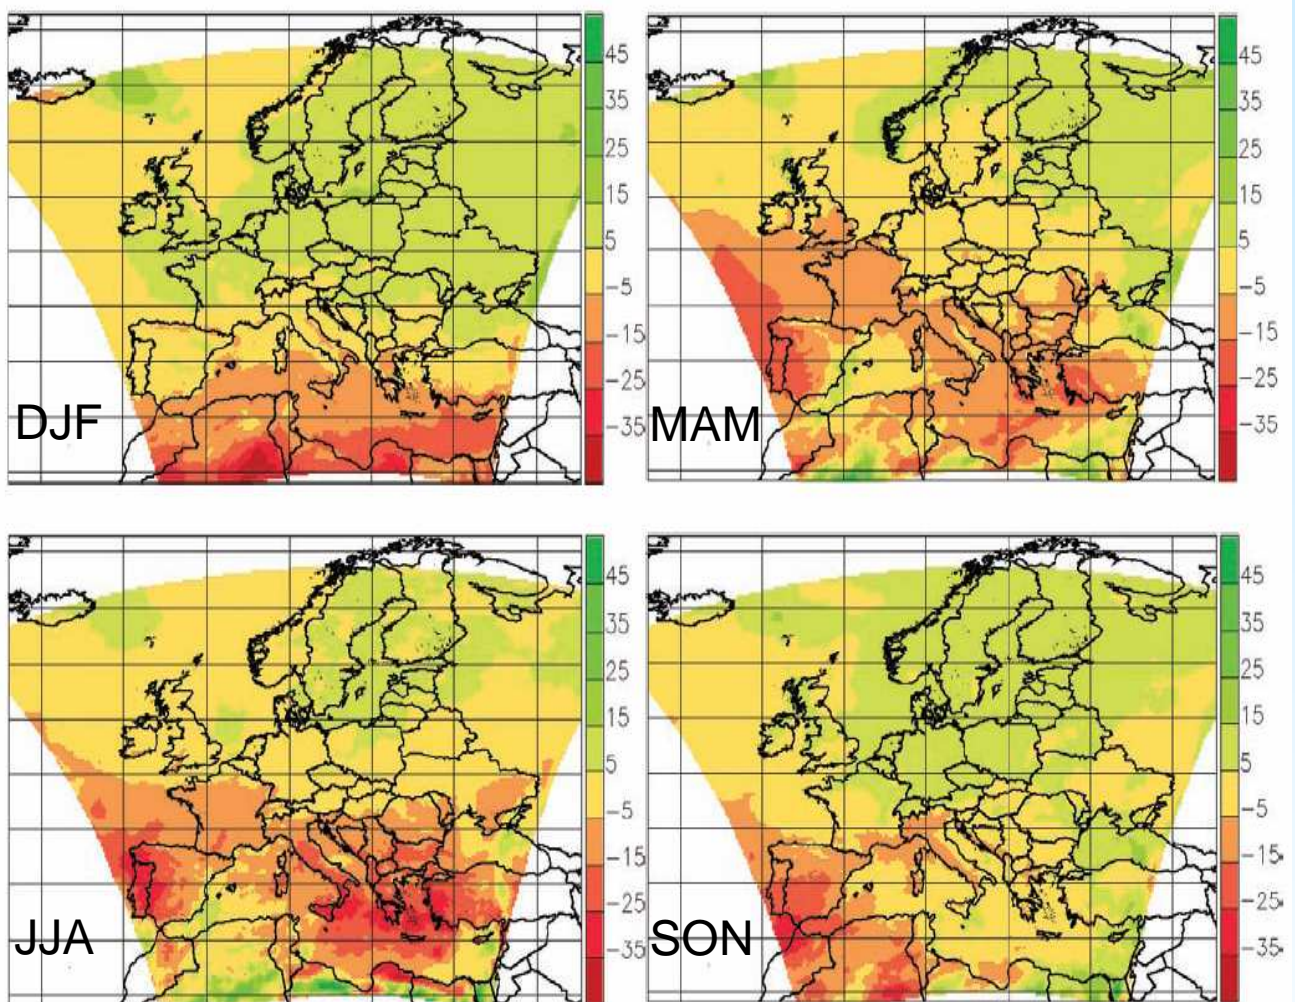

Projected changes in seasonal mean surface air temperature (°K): 2021-2050

Projected changes in seasonal mean surface air temperature (°K) under the A1B scenario, multi-model ensemble mean of RCM simulations for the time period **2021–2050 relative to 1961–1990** seasonal means.

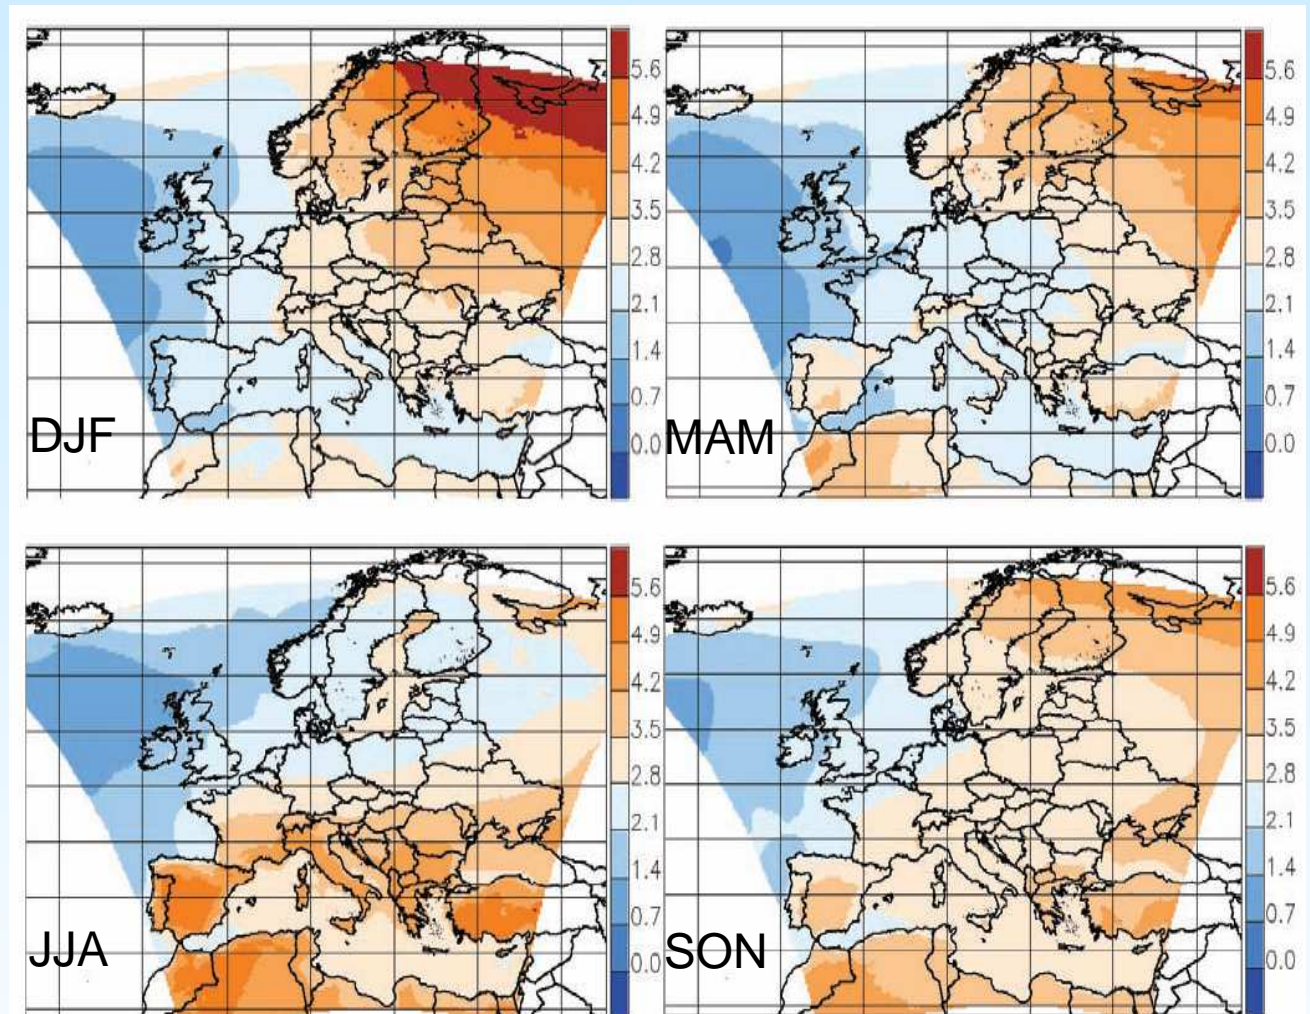

Projected changes in seasonal precipitation (%)

2021-2050

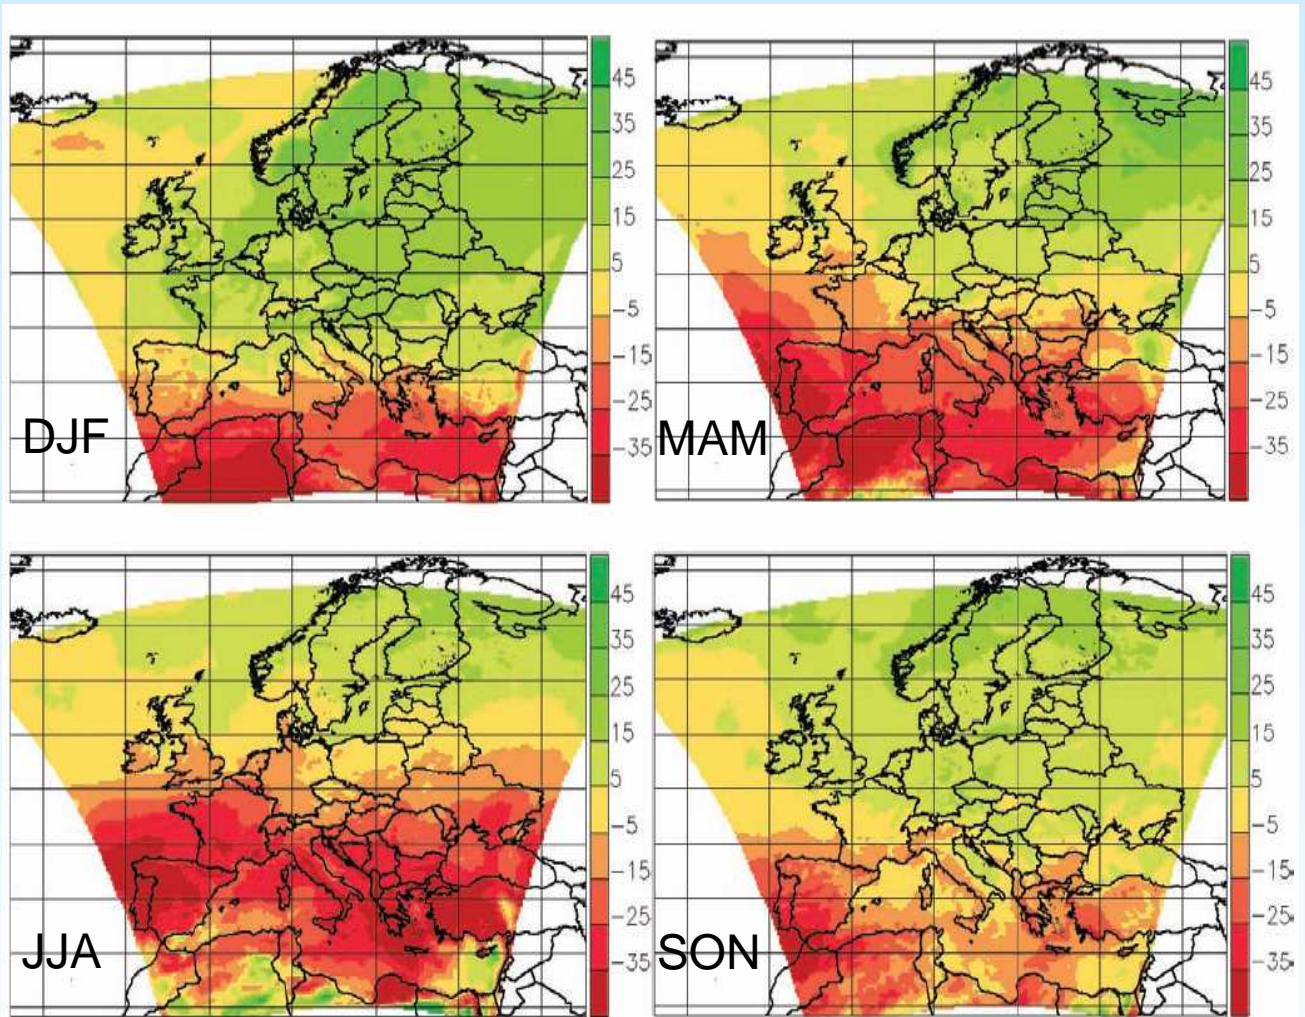

Projected changes in seasonal precipitation (%) under the A1B scenario, multi-model ensemble mean of RCM simulations for the time period 2021–2050 relative to 1961–1990 seasonal means.

Projected changes in seasonal mean surface air temperature (°K): 2071-2100

Projected changes in seasonal mean surface air temperature (K) under the A1B scenario, multi-model ensemble mean of RCM simulations for the time period **2071–2100 relative to 1961–1990** seasonal means.

Projected changes in seasonal precipitation (%) 2071-2100

Projected changes in seasonal precipitation (%) under the A1B scenario, multi-model ensemble mean of RCM simulations for the time period 2071–2100 relative to 1961–1990 seasonal means.
